

Taehyung Noh

yestaehyung@hanyang.ac.kr |

 taehyung-noh |  yestaehyung |

521, Fusion Technology Center, Hanyang University, Seoul, South Korea 04763

Research Interests

My research interest lies in Human-AI Interaction, with a focus on developing trustworthy and personalized AI systems.

Experience

- Hanyang Human-Centered Computing Laboratory  Jan. 2022 - Present
Research Assistant Seoul, Korea
- Ajou Human-Computer-Interaction Lab at Dept. of Software Aug. 2020 - Dec. 2021
Undergraduate Research Assistant Suwon, Korea

Education

- Hanyang University Mar. 2022 - Present
M.S. & Ph.D. Integrated Student, Department of Artificial Intelligence (Advisor: Kyungsik Han) Seoul, Korea
- Ajou University Mar. 2018 - Feb. 2022
Bachelor of Engineering, Department of Software Suwon, Korea

Projects

- LLM Deceptive Persuasion (CHI 2026) 2026
Co-Author
 - Investigated whether LLMs can persuade humans using deceptive strategies through a large-scale empirical study.
 - Developed a taxonomy of deceptive persuasion strategies and analyzed how LLMs leverage these strategies in persuasive interactions.
- KETI Industrial AI Data Preprocessing Platform Present
 - Developing an AI data preprocessing platform for industrial applications.
 - Providing an integrated solution for efficiently processing and analyzing data across various industrial domains.
- TRIPLE (AAAI) 2025
First Author
 - TRIPLE (Theory-guided Reasoning for Intent and habit Profiling with LLMs for pErsonalization) is a novel framework that integrates dual-process theory and the Theory of Planned Behavior (TPB) into LLM-based user modeling.
 - Constructs both habitual and intentional behavior profiles, then generates behavioral rationale that explains the interaction between these processes to predict user behavior.
- TRIPLE (CIKM) 2025
First Author
 - TRIPLE is a profiling technology that combines the Theory of Planned Behavior (TPB) with Large Language Models (LLMs).
 - Uses LLMs to understand a user's psychological motivations and refines their profile by comparing predictions with actual behavior, dramatically improving personalization services.
- Red Teaming Attack Dataset Analysis 2024
Project Leader
 - Analyzed real-world LLM vulnerabilities using attack data from the 2023 DEF CON 31 Generative AI Red Teaming Challenge.
 - Preprocessed and relabeled the dataset to identify which target categories are most susceptible to harmful-content attacks.
 - Classified victim groups and categorized prompt types to reveal systematic patterns in successful jailbreaks.
- Multi-Agent Personality Detection System (PADO) 2024
Second Author
 - PADO is a multi-agent system that detects personality traits (OCEAN) from user-generated text.

- Multiple specialized agents collaborate to perform more accurate personality analysis.
- Fashion-FINE
Third Author 2024
 - Fashion-FINE is a Vision-Language Pre-training model for fine-grained fashion retrieval.
 - Introduces modality-agnostic adapter, hard negative mining with focal loss, and comprehensive cross-modal alignment.
- My Own Style (MOS)
First Author May. 2022 – Present
 - Investigated how domain expertise shapes user perception and satisfaction with fashion-recommendation outcomes.
 - Built MOS dashboard that analyzes outfit images and recommends similar/diverse fashion items.
 - Large-scale study with 166 participants showing fashion experts prefer highly similar recommendations while non-experts prefer diverse results.

Honors and Awards

Best Paper Award, Korea Data Mining Society	Nov. 2024
Best Presentation Award, Korea Software Congress (KSC 2023)	Dec. 2023
Best Inventor Award, Seoul International Invention Fair	Dec. 2022
Participation Award, mySUNI Creative Challenge	Dec. 2022

TEACHING EXPERIENCE

Co-lecturer

- ITE3062: Human-Computer Interaction (In English) Fall 2024

Teaching Assistant (TA)

- SOI3010: Laboratory practice of Intelligence Computing 2 Fall 2024

ACADEMIC SERVICES

Conference Reviewer

- Conference on Empirical Methods in Natural Language Processing (EMNLP) 2024
- ACM Conference on Human Factors in Computing Systems (CHI) 2024
- ACM International Conference on Information and Knowledge Management (CIKM) 2023
